MONTAGE II HEAVY INDUSTRIAL

THE #1 ALTERNATIVE TO CHAIN LINK FENCING
MONTAGE MAKEOVERS ARE SWEEPING THE NATION

SEE WHY . . . INSIDE

Ornamental Fences for Commercial & Industrial Specifiers

Fusion Welded Steel Construction

Montage Plus® and Montage II® are crafted with an inherent beauty that adds a decorative touch to any landscape. The fusion welded steel construction makes it applicable for all types of heavy industrial applications as well as for commercial installations such as retail businesses, storage facilities, schools, health care facilities, golf courses and recreational parks. The maintenance-free electro-deposition coating (E-Coat) makes Montage Plus® Commercial and Montage II® Heavy Industrial suitable for any climate, hot or cold, wet or dry; Ameristar® uses the same cyclic testing technology used in the automotive industry to ensure that the coating will withstand repeated shifts in temperature and humidity. The All Terrain Flexibility, ‘ATF’ design enables fence installation that follows significant grade changes.

COATING & WARRANTY

The E-Coat combination of galvanized steel, zinc phosphate pre-treatment, and epoxy and acrylic double coating provide the protection necessary to withstand adverse weathering effects and justify the ‘best-in-the-business’ 20 Year Warranty.

COLORS, AVAILABILITY & MAINTENANCE

Montage Plus® Commercial and Montage II® Heavy Industrial are available in black and bronze. Color chip samples can be requested for actual color. Little or no maintenance is required as the E-coated components will remain corrosion-free for years to come. If coating is damaged by accidental impact, the affected components can be readily repaired with Ameristar’s matching custom finishes (either spray or paint pen application). Montage Plus® Commercial and Montage II® Heavy Industrial fence components are packaged as necessary to ensure damage-free shipping.

To order, simply specify the fence or gate design series, color and height desired. Then figure and provide the quantities needed. Contact Ameristar® for the nearest distributor.

UNIQUE DESIGN FEATURES

- **All Terrain Flexibility (ATF)**

Unlike conventional welded panels that require stair-stepping along grades (leaving gaps and open areas below the fence), the all-terrain flexibility (ATF) of eight-foot long Montage Plus® Commercial and Montage II® Heavy Industrial panels allows them to rack up to 48” on Classic, Majestic and Genesis styles; up to 18” on Invincible® curved picket style.

- **Flush Bottom Rail Option**

For some applications, a flush bottom rail may be necessary to meet local building codes or simply to meet an aesthetic preference.

COMPONENT SIZES

System	Height	Pickets	Rails	Posts
Montage Plus® Commercial	7' & 8'	3/4" x 14 GA.	1-7/16" x 0.072" Top 1-1/2" x 0.072" Sides	2-1/2" Sq. x 14 GA.
Montage II® Heavy Industrial	All Heights	1" x 14 GA.	1-3/4" x 0.105" Top 1-3/4" x 0.105" Sides	3" Sq. x 14 GA.

The Changing of the Guard

Forward-Thinking Architects Are Choosing the Montage Ornamental Option

For decades, the only product specified for commercial and industrial perimeter fencing was 6' tall chain-link with barbed wire.

APPEARANCE

The look is unfriendly, oppressive and tiresome. The profile is broken by sharp exposed selvage twists and unsightly tie wires. Standard framework and fabric finish is a layer of graying zinc.

SECURITY

Chain-link fence fabric can be cut easily, allowing a breach large enough to gain access within 15 seconds.

With a look that is less than attractive and a fabric that is less than secure

What exactly does that give you?

WGRZ-TV, Channel 2, the Buffalo, New York NBC affiliate had previously erected a chain-link fence, citing the need to protect millions of dollars worth of satellite dishes, news vehicles and other broadcasting equipment. As reported in the Buffalo News, this led to three decades of barbed criticism from neighborhood business and civic leaders. "It was sending the absolute wrong message about safety and hospitality in the neighborhood," said Mike Croce, whose upscale Buffalo Chop House is next door. Buffalo Place, a coalition of downtown businesses, had been urging Channel 2 to get rid of the fence for several years.

After thorough evaluation, Channel 2 announced that it would be replacing its much-criticized, razor wire-topped chain-link fence with 'a safety fence with the appearance of wrought iron'.

Now, a fusion-welded steel ornamental fence is here, complete with a maintenance-free E-coat finish and a 20-Year warranty.

APPEARANCE

The look is open and attractive, while conveying the assurance of strength to discourage potential trespassers. The smooth profile blends well with adjacent landscaping and architecture.

SECURITY

Fusion-welded panel construction, one-way security fasteners on brackets, and high-tensile steel material prohibit easy cutting.

With Montage, there is now a superior and affordable alternative to chain link

Montage adds value to the property.

With the approval and endorsement from the city of Buffalo, the chain-link fence was removed and replaced by an 8' tall ornamental fence, Invincible (curved picket) style, from Ameristar. "We found an alternative that will provide the same, if not better level of security, without the intimidation factor," said WGRZ General Manager James W. Toellner. "We think the new look is more fitting with our '2 On Your Side' slogan."

"This is the neighborly thing for them to do," said restaurateur Croce. The new fence is also receiving positive comments from the Buffalo Place business group.

AFFORDABLE PERIMETER SECURITY WITH GOOD LOOKS

CLASSIC
Style C2 (2-Rail)
Style C3 (3-Rail)
Style C4 (4-Rail)

The extended spear top of the Classic™ style gives the secure structure an added touch of elegance. Classic™ is available in 2-rail, 3-rail and 4-rail designs.

GENESIS
Style G2 (2-Rail)
Style G3 (3-Rail)
Style G4 (4-Rail)

The Genesis name was coined for this panel design because it acts as a foundation for creation of multiple custom looks by the addition of decorative Triad or Quad-Flare finials. The Genesis™ style is base for adding decorative finials.

MAJESTIC
Style M2 (2-Rail)
Style M3 (3-Rail)
Style M4 (4-Rail)

Majestic™ is a simple, yet elegant style with a smooth top rail, available in 2-rail, 3-rail and 4-rail designs. It is ideally suited for public pools and play areas.

INVINCIBLE®
Style I2 (2-Rail)
Style I3 (3-Rail)
Style I4 (4-Rail)

Invincible means 'incapable of being overcome'. The gradual outward curve of the pickets makes this style a superior alternative to the chain link and barbed wire fences of the past. 3-rail and 4-rail profiles are available in 7' and 8' heights.
